

Collecting in-depth information on relevant topics for the club

You have already collected a number of measures and activities with your fellow club members. Now, you would like to prepare the panel discussion about the following topics:

You have decided to split up the task. Therefore, you divide into groups and each group collects in-depth information on one category and comes up with some measures on how to implement the topic in your school (e.g. with public activities such as protests, strikes or in-school activities such as assemblies, articles in the school magazine).

Get into groups of 3 or 4. Collect information and ideas and sum up your findings on one page. This forms the basis for your part in the following panel discussion in which you decide on the first measures the club is going to take. These measures will be published on an informative poster.
